

Ryon S. Walker received his BS in animal science from Texas A&M University in 1997. In 1996, he interned for Leachman Cattle Company in Billings, MT and is there that he developed an interest in reproductive physiology. While at College Station, he also managed Butler and Son Charolais while earning his Master's degree in animal science. From there he attended Colorado State University where he received his Ph.D in reproductive physiology with a focus in estrous synchronization and artificial insemination.

Ryon spent 6 years with the University of Minnesota as a Beef Extension Specialist conducting programs and workshops across the state and a research emphasis in extending the fall grazing season and evaluating cow size and efficiency within their herd.

Ryon spent over 6 ½ years with Louisiana State University as an assistant/associate professor conducting research in the areas of cow feed efficiency and alternative feeding strategies during the backgrounding period.
