

Dr. Gary Williams is Regents Fellow, Texas A&M AgriLife Research Faculty Fellow, and Professor in the Animal Reproduction Laboratory, Texas A&M AgriLife Research-Beeville and Department of Animal Science, Texas A&M University-College Station. He serves as a member of the Interdisciplinary Faculty of Reproductive Biology and the graduate faculty at Texas A&M. Williams' current research focuses on the impact of perinatal nutrition on neuroendocrine mechanisms controlling puberty in the heifer and on reproductive seasonality in the mare. Applied research emphasizes nutritional and pharmacological approaches for controlled breeding systems. Williams holds B.S. and M.S. degrees in Animal Science from New Mexico State University and the Ph.D. in Animal Physiology from the University of Arizona. He is a previous recipient of the ASAS Animal Physiology and Endocrinology Award (2004) and received the Research Fellow Award in 2017. Williams is a former Associate Editor of JAS, and is currently Editor-in-Chief of Domestic Animal Endocrinology.
